

# Mah Jong Cards

version 3.0 (Canton 3d)

by Gareth J M Saunders

## Why Mah Jong Cards?

While traditional Mah Jong tile sets are heavy, and therefore not the most portable, you can quite conceivably take a pack of Mah Jong cards anywhere.

## The Mah Jong Set

This file contains enough cards to produce a full 144 card set, including seasons, flowers and an extra 8 jokers.

## Font Used

I have used, in this version, the commercial Canton and Canton 3D true-type fonts from [www.partae.com](http://www.partae.com) (US\$49) which produces a clean, simple and universal design.

## Colour Scheme

I have adopted the following colour scheme for cards, which keeps with the traditional association between the suits and dragons (with thanks to Tom Sloper):

|            |   |           |
|------------|---|-----------|
| Bamboo     | — | Green     |
| Dots       | — | Black     |
| Characters | — | Red       |
| Winds      | — | Blue      |
| Dragons    | — | As Dragon |
| Seasons    | — | Black     |
| Jokers     | — | Brown     |

## Printing

Use thick card. If the card image shows through the card you can print a disruptive backing image on the reverse side of the card before cutting. An appropriate image is available in PDF format on my website.

To produce a full set of 144 cards please print pages 2-5 (Bamboos; Dots; Characters; Winds, Dragons and Jokers) four times each. You need only print the Seasons and Flowers once.

These cards are copyright © 2001-2003 Potting Shed Designs / Gareth J. M. Saunders
